Mr. Allen Elliott – SSFL Project Director
NASA MSFC ASO Building 4494
Huntsville, AL 35812

RE: Comment on the NASA DEIS

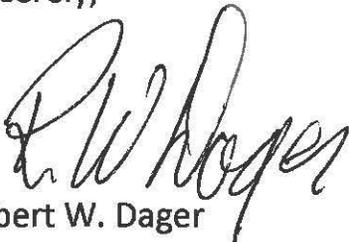

Dear Mr. Elliott:

Although the problem of dust control is touched on in the DEIS, no concern is paid to the millions of gallons of fresh drinking water that will be required for this onsite control.

Water is, and always has been, a vital concern to the communities and population of Southern California.

Where is the examination of this aspect of the proposed cleanup ?

Sincerely,

A handwritten signature in black ink, appearing to read "R. W. Dager". The signature is fluid and cursive, with the first letters of each name being capitalized and prominent.
